I am a designer with 3 years of professional experience in architecture, web, and identity. I have played a crucial role in the development and execution of a large variety of project types both independently and as a part of a larger team. My diverse and detail oriented skillset and strong work ethic position me as a valuable team member in production and leadership capacity. Since completing my Master of Architecture at Tulane University, I have quickly expanded on my knowledge of branding, print, and digital design as the Director of Design at a fast paced food-tech startup.
